

THE WORLD OF OUR PUPPIES

We want with these small details make you aware of what we mean by "our puppies"!

There are many questions that are suggest and purpose to us: we have therefore decided to make available all of what is the policy of our small family kennel "amateur" ... amateur in the true sense of the word was born just pure and simple passion, day after day and continues to grow, because there is always something new and interesting to learn in the world of dogs.

We never tire of show eith pride that the pups born from our hairy friends are "pieces of our heart," the fruit of many labors, travel or longer, the nights passed on specialized texts, meetings, courses, research details health, genetics and the character of parents and ancestors.

Obviously for us is important, indeed essential, personally know any prospective buyers and explore their desires and their hopes!

If we agree and we have the right requirements on both sides, we have pleasure to personally show our dogs and puppies in the first place because there must be feeling between the puppy and the future owner

Our puppies are sold to people who have certain desires and certain qualities corresponding to the needs and the nature of the puppy: evaluate together the kind of puppy looking for what they expect from the puppy and standard of living and the composition of the family. Note that in both races that we have raised a considerable difference between what is expected of a dog "work", companion or expo, so the choice will be made not only by the color and gender But mainly depending upon the nature of the small!

For all these reasons, we have pleasure to speak with a voice that will inform people about our puppies, so we can compare and better respond to all questions, doubts and curiosity, especially to verify whether the puppies for sale are suitable for person who asks them!

We are beginning our live as breeder and, cause noone know us, we must "do a name" First of all why and why we believe in the continuation of a race healthy, our pups are born on genealogical studies is that morphological character, and especially in terms of health!

These are the key points of our breed: puppies are children of parents also tested for dysplasia and elbows, and (in the Australian shepherd), for hereditary eyes problem (hocolopaty).

The aussie baby are also subject to visit eye for hocolopaty and certificates in their second month of life.

As for the aussie we select only the tail, unless you are born with tail hub, twisted, knotted or otherwise defective, or unless there is a desire for a particular buyer who wishes to cut the tail(caudectomy) to be carried out by the veterinarian by the 4th day of life. In this case, the puppy must be booked by the 2nd day of life with a cash deposit.

As for the "cane corso", from our personal experience prefer to cut the tail to the 4th verteb., unless there is a desire for a particular buyer who wishes integrates the tail or the puppy is intended abroad, in countries where there the prohibition. In this case, the puppy must be booked by the 2nd day of life with a cash deposit.

Our puppies are also subject to two months of age (usually between the 42nd and 45th days of life) in a game for their new and fun run "character tests" by a team veterinary behaviorist and behavioral which verifies their attitudes and while they learn, play and have fun like mad, we briefly movie! For us, and who will become the two-legged friend, a dear remembrance will be recorded in a CD.

For us a puppy is not a source of revenue, but a source of joy that then we are pleased to donate the puppy who makes a reason to live.

And the puppy is the representation and also the fruit of others: why we prefer that you come to visit us, to see his mother, the father even if the stallion is our property. Only then we can give an account of how they were bred, kept and raised puppies, you can see the environment around them, the climate of serenity (but sometimes the anxieties and concerns) and joy that day by day they learn what it means to "become big"!

Please note that the purchase of a puppy is a concern for years and years, and that in the first few months will give you a lot to do and will absorb many of your energies. If you have conscience and constant dedication, what is now "only" a small ball of fur, tomorrow will be your friend to the skin, but this will depend on your way to resolve against him and by that time you can spend.

Our puppies are sold after 65 days, or after the enforcement of mandatory vaccinations and necessary worming treatment. All this time, moreover, is essential: so the little learns from their mother and from all the ground rules and this is the best for its balance and learn correctly brothers side by side with the laws of the flock. We feel responsible and we believe firmly that our assiduous presence ensures optimal mental and physical growth of the small stimulation through visual, tactile and sound typical of man. A well-puppy dog socialize will be a well-balanced adult, if those who will take proper socialization in the newspaper.

For the pups born in the summer is practiced prophylaxis against filariasis cardiopulmonary, continue to live in areas where endemic under veterinary supervision.

Our puppies are all subscribers to the flapper of Ferrara, which provides supply to the See ENCI Central Milan, and the pedigree will be delivered after a year of life.

Will be delivered:

- ◆ Health Photocopies of pedigree mother and father
- ◆ Photocopy the inclusion of the microchip
- ◆ Canine registrar's office photocopy of registration form and supply
- ◆ A dossier with advice and tips, information
- ◆ Food, on cleaning and grooming, based on rules education, the needs ethological.

We want to make it clear to us that our puppies will always be there! We will be available for new friends of our puppies for each board, each request for each issue, for eventual playback, for any health problem and, why not?, To participate in any large or small forward. We are happy to find ourselves all together for them returned!

Please forgive this long for written, but this is our way of bringing up, because we believe in these two races so different and so characteristic! Having lived this wonderful and exciting reality and continuing to live with the owners that we have taken the puppies, we can say with great pride that we are so happy, and the only thing I can suggest is to go you are here! We do!

We remain at your disposal for any further information.
